DB ERROR: ORA-12154: TNS: could not resolve the connect identifier specified

1. Ask the user if it is the first time they will use the System. If yes, do the following:

2. Open File Manager-> This PC-> Windows C->app-> laptopNumber->product->11.2.0->client_1->NETWORK->ADMIN

- C:\app\smd095\product\11.2.0\client_1\NETWORK\ADMIN

3. OPEN Notepad and copy the content of tnsnames.ora

4. Go to Sir Ian's .15 (\\10.169.140.15\SD Share\SDStaffs\ian\files), Open a New notepad then copy the content of tnsnames.ora

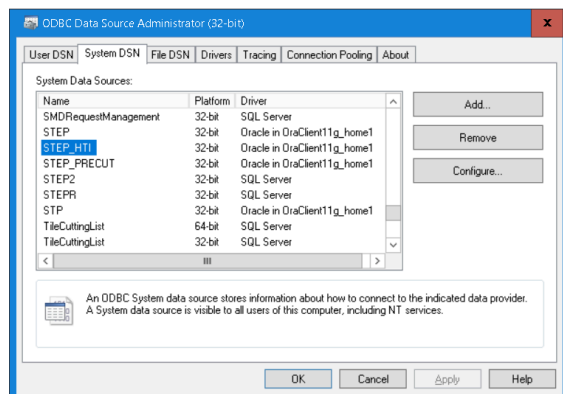

5. Copy everything below this

```
# TNSNAMES.ORA Network Configuration File:
C:\app\smd095\product\11.2.0\client_1\network\admin\tnsnames.ora
# Generated by Oracle configuration tools.
```

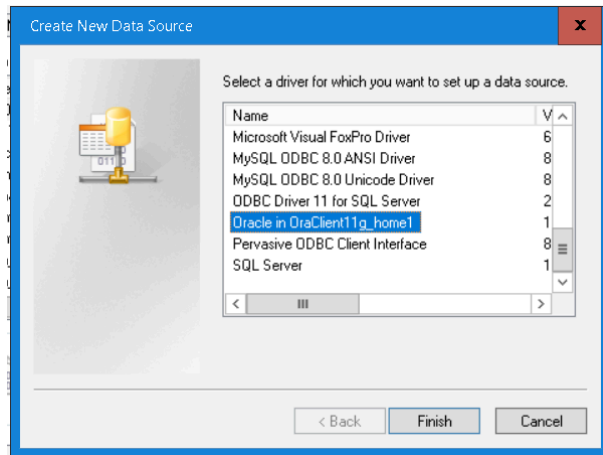

6. Paste it in the clients sides Notepad that contains the tnsnames.ora

7. Save

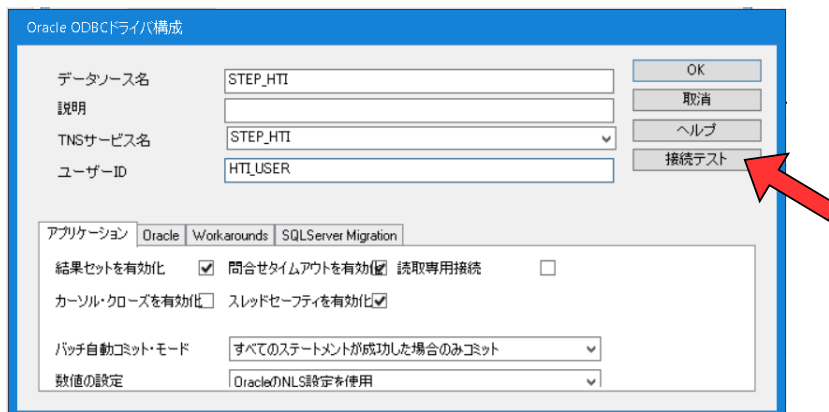

8. Open ODBC, Check if there's a connection for STEP_HTI

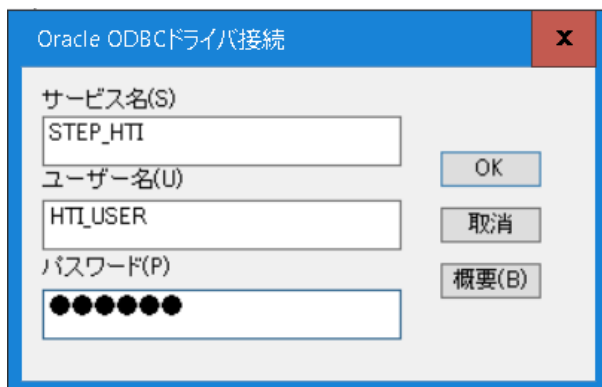

9. If there is no Connection, Click Add -> Select Oracle OraClient11g_home1, then click finish

10. Input the following

11. Input "HTTII" as password then click OK

12. Open the system to see if there's still an ERROR.
