Test Results and Quality Reports

1.1 Report of the Testing Results

No.	Software Testing	Results of Testing				Results of Bug			
		Total Test Case	Tested	Remaining	Percentage	Total Bug	Fixed	Remaining	Percentage
1	Unit Test	1240	1240	0	100%	29	29	0	100%
2	Integration Test	35	35	0	100%	1	1	0	100%
3	Product Test	29	29	0	100%	1	1	0	100%
4	User Acceptance Test					0	0	0	0%

Classification		Total	Assessment
Bug	Requirement Specification	1	
	Basic Design	0	
	Source Code	30	
Not Bug	Network Problem	0	
	Wrong Setting (Property File)	0	
	Others	0	

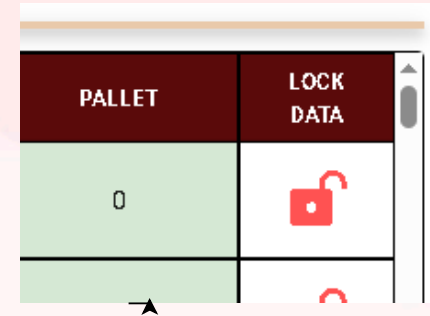

<Note>

- Results of Testing Percentage = $(\text{Tested} / \text{Total Test Case}) \times 100$
- Results of Bug Percentage = $(\text{Fixed} / \text{Total Bug}) \times 100$
- The percentage should be rounded to the nearest whole number

Result

Release Procedure

3.1 Deployment

1. Create a project folder on a server.

Server: hti-webapps02

Path: C:\Apache24\htdocs\BankinSchedule

Folder Name: BankinSchedule

2. Clone the project from GitLab to the Local PC.

URL: <http://10.168.72.127/sd-factory/bankinschedule.git>

3. Change the DB connection from the test DB to the actual DB (.env file).

4. Using FTP, upload the cloned project to the created project folder in step 1.

5. Create an Apache alias on the actual server.

Server: hti-webapps02

Path: C:\Apache24\htdocs\BankinSchedule

File Name: BankinSchedule

6. Restart the Apache service to apply the changes.

7. Execute the following commands.

Server:

Path:

Commands:

- yarn run dev
- yarn run prod
- composer dump-autoload
- php artisan optimize

8. Delete test data in the newly created transaction tables.

Server: JD-003

DB: Bankin Schedeule

Tables:

- T010_PLAN
- T020_MATERIAL
- T050_DATA_IMP

3.2 Data Transfer

<Schedule>

2025/10/17 14:00 (Military Time)

<Server>

From: MIS_SQL

To: JD-003
