

RequestNo: I0722-1864

KindName: User Support

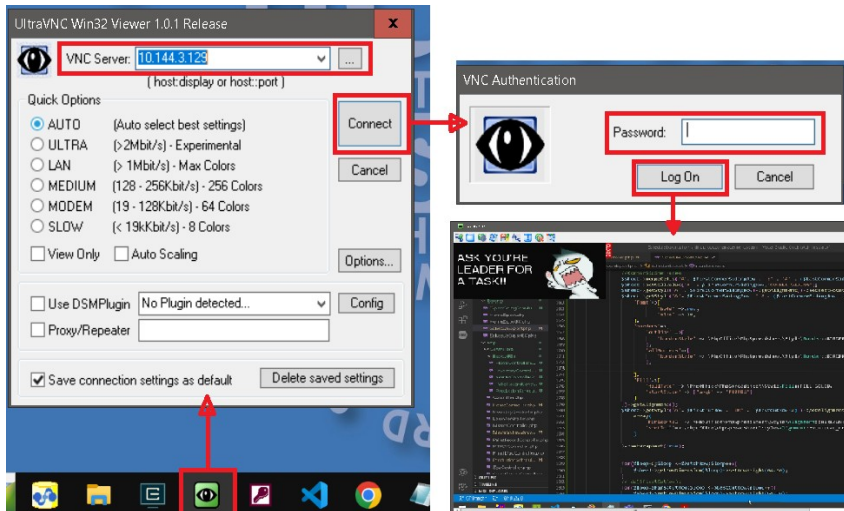

Details: URGENT!! Request to check CPU-13565/10.144.3.129, error upon opening barchart maker system.

Solutions: The error in barchart maker has been solved, by adding ODBC32 connection.

1) VNC User's PC

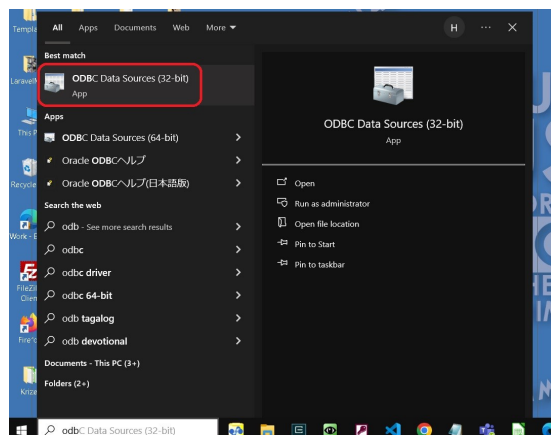

1.1) VNC Server(User's CPU No or IP Address) sample: **CPU-13565** or **10.144.3.129**

2.2) Click Connect → Enter Password → Log On

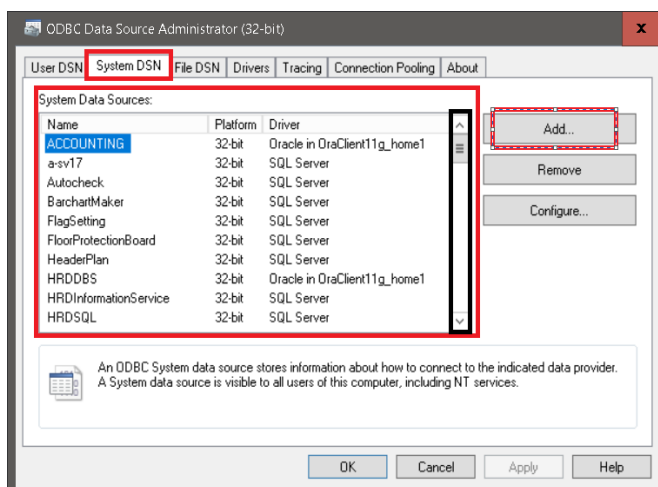

2) Search **ODBCAD32**

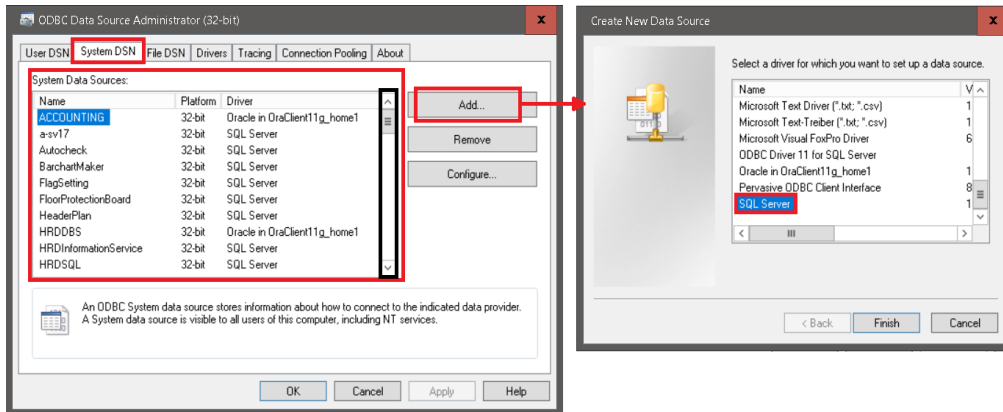

Window's logo + S → Typec and Click ODBCAD32

3) Click **System DSN** then check the **System Data Sources** all the required connections of the system

3.2) Click **Add** for missing Connection → Click **SQL Server**

3.3) Add the **Data Source** to SQL Server → Input/Type **Name** and **Server** → Click **Next**
Click **Second BUTTON** → input **Login ID** and **Password** of the **Server**
