

Request to have two(2) barchart of Urban Roof in Barchart Maker System, one (1) for Urban Roof-1 and another one (1) for Urban Roof-2.

1. Go to jd002, get BarchartMaker Test Leng

2. Create a folder in desktop an create a copy of the file.

3. Right Click the file, send to resurectshift and press Shift + Enter

4. Search for Urban Roof by clicking Ctrl + F then type Case 69

5. Right Click then click Definition, then Copy the Function of Urban Roof

6. Paste the Code and then rename the Function to Urban Roof 2

```
' 20240916 UrbanRoof2 Jea
Public Sub getUrbanRoof2(strCDNO As String, strhousetype As String)
    Dim strUR, strUR_2 As String
    Dim strURUpdate As String
    Dim rsUR As New ADODB.Recordset
    Dim rsUR_2 As New ADODB.Recordset
    Dim intURDataCount As Integer
    Dim intMinSeq, intMaxSeq As Integer
    Dim intCnt As Integer
    Dim intCntMB As Integer

    If strCDNO = "" Then Exit Sub

    strUR = ""
    strUR = strUR & " Select * From W_Temp_Specification Where CDNO = '" & strCDNO & "' Order By MAT_NAME"

    intCnt = DCount("*", "W_TEMP_SPECIFICATION", "CDNO='" & strCDNO & "'")
    intCntMB = DCount("*", "W_MAIN_BARCHART", "CDNO='" & strCDNO & "'")

'20240812 urbanroof
    strURUpdate = ""

    If intCnt < intCntMB Then

        strURUpdate = "Delete From (Select Top " & Abs(intCnt - intCntMB) & " CDNO From W_MAIN_BARCHART Where CDNO='" & strCDNO & "' ) A"
        DoCmd.SetWarnings False
        DoCmd.RunSQL strURUpdate
    End If
End Sub
```

7. Go back to the case 69 and create a new case for Urban Roof 2(Look fro the last Section ID Number in SQLDBX Database Name: jd003, Table Name: Sections,). the Function declared to the case must be the name of the function you've named the Urban Roof 2

```
Call getTFTile(Nz(strCDNO, ""), strhousetype)
Case 92
    Call getUrbanRoof2(Nz(strCDNO, ""), strhousetype)
End Select
```

8. Go to SQLDBX, Database Name: jd003, Table Name: Sections, then insert a new data for Urban Roof 2.

The screenshot shows the SQLDBX application window for the 'jd-003' database. The 'Tables (121)' pane on the left lists various tables, including 'Sections'. The main window displays the 'Script2*' script editor with the following SQL code:

```
1
2
3 INSERT INTO dbo.Sections (SectionID, SectionName, TableName, MaxSchedDays, withNightShift, ConstructionMaterialCode, ConstructionMaterialDetailCode, DivisionTable, ReqCD, CompanyCode, GroupPerRowFlg, JapanExcelBasi)
4 VALUES (92, 'URBAN ROOF2', 'T_URBAN_ROOF2', 10, 0, 'UR', 2, 'T_PIPE_INVOICE', 113, 'HTI', 0, 1, 1, NULL, getdate(), NULL, getdate())
5 GO
6
```

Below the script editor, a table grid shows the data for the 'Sections' table. The table has 12 columns: SectionID, SectionName, TableName, MaxSchedDays, WithNightShift, ConstructionMaterialCode, ConstructionMaterialDetailCode, DivisionTable, ReqCD, CompanyCode, GroupPerRowFlg, and JapanExcelBasi. The data row shows the following values:

SectionID	SectionName	TableName	MaxSchedDays	WithNightShift	ConstructionMaterialCode	ConstructionMaterialDetailCode	DivisionTable	ReqCD	CompanyCode	GroupPerRowFlg	JapanExcelBasi
92	URBAN ROOF2	T_URBAN_ROOF2	10	0	UR	2	T_PIPE_INVOICE	113	HTI	0	1

9. Copy the Content of Urban Roof table by, selecting * from Column Controls where sectionID=69. Then double Click the upper left part of the table to select all, then right click then choose Generate, and then Click Insert

10. Change the section ID from 69 to 92 since the Section ID of Urban Roof 2 is 92, then change the Created date, and Updated date using getdate(), then click run to execute the code.

11. Check if the data is added by selecting all from Column Controls where SectionID=92

The screenshot shows the SQL Server Enterprise Manager interface. The query window displays the following SQL statement:

```
1 SELECT * FROM ColumnControl WHERE SectionID=92
```

The results pane shows a table with 15 rows of data. The columns are: SectionID, ColumnName, SortColumn, ShipReqColumnName, ColumnWidth, PrimaryKeyFlag, NewFlag, OrderByColumn, ColumnDataType, DefaultValue, ManualUpdateFlag, ManualUpdateSort, and ManualLockedFlag.

SectionID	ColumnName	SortColumn	ShipReqColumnName	ColumnWidth	PrimaryKeyFlag	NewFlag	OrderByColumn	ColumnDataType	DefaultValue	ManualUpdateFlag	ManualUpdateSort	ManualLockedFlag
92	YY	1	RequestYear	0	0	1	NULL	N	NULL	0	NULL	
92	WW	2	RequestWeek	0	0	1	NULL	N	NULL	0	NULL	
92	Seq	3	NULL	0	0	1	NULL	N	N:0	0	NULL	
92	CDNO	4	ConstructionCode	0	1	1	1	A	NULL	1	1	
92	AdditionalOrderFlg	5	NULL	0	0	0	2	A	NULL	1	3	
92	NameCD	6	NameCode	0	0	1	NULL	A	NULL	1	2	
92	DSTN	7	DSTN_NM	0	0	1	NULL	A	NULL	0	4	
92	House_Type	8	NULL	1200	0	0	NULL	A	NULL	1	NULL	
92	HINBAN	9	NULL	1800	0	0	NULL	A	NULL	1	5	
92	UR1_ACCESSORIES	11	NULL	600	0	0	NULL	N	N:0	1	6	
92	UR2_UNIT	12	NULL	600	0	0	NULL	N	N:0	1	8	
92	REMARKS	13	NULL	1200	0	0	NULL	A	NULL	1	9	
92	ExcludeFlg	14	NULL	0	0	1	NULL	B	N:0	0	NULL	
92	Indication	15	Indication	0	0	1	NULL	A	NULL	0	NULL	
92	Shipweek	16	ProductionPlantRemarks	0	0	1	NULL	A	NULL	0	NULL	

12. Right Click on T_Urban_Roof, then click Script Create. Change Table Name to T_UBAN_ROOF2, and Constraint to PK_T_URBAN_ROOF2

The screenshot shows the SQL Server Enterprise Manager interface. The query window displays the following SQL statement:

```
1 CREATE TABLE dbo.T_UBAN_ROOF2
2 (
3     YY INT NOT NULL,
4     WW INT NOT NULL,
5     Seq INT NOT NULL,
6     CDNO NVARCHAR(50) NULL,
7     AdditionalOrderFlg NVARCHAR(3) NULL,
8     NAMECD NVARCHAR(5) NULL,
9     DSTN NVARCHAR(50) NULL,
10    House_Type NVARCHAR(50) NULL,
11    HINBAN NVARCHAR(50) NULL,
12    UR1_Accessories NUMERIC(18,0) NULL,
13    UR2_Unit NUMERIC(18,0) NULL,
14    CHAR(200) NULL,
15    NVARCHAR(50) NULL,
16    CHAR(50) NULL,
17    TIME NULL,
18    TIME NULL,
19    CHAR(20) NULL,
20    CHAR(20) NULL,
21    CHAR(20) NULL,
22    CHAR(20) NULL,
23    CHAR(20) NULL,
24    CHAR(20) NULL,
25    CHAR(20) NULL,
26    CHAR(20) NULL,
27    CHAR(20) NULL,
28    CHAR(20) NULL,
29    TIME NULL,
30    TIME NOT NULL,
31    NVARCHAR(50) NULL,
32    NVARCHAR(50) NULL,
33    BIT NULL,
34    PK_T_URBAN_ROOF2 PRIMARY KEY (YY,WW,Seq)
```

The context menu is open, showing the following options:

- Script CREATE
- Script SELECT
- Script UPDATE
- Script INSERT
- Add to Favorites
- Script Permissions
- Drop ...
- Edit Table Data
- Export Table Data
- Import Data
- Object Search ... Ctrl+Shift+F
- Scripting Options ...
- Table Properties ...

The Results pane shows the following message:

```
Query completed: SELECT * FROM EmployeeChartSections WHERE Employee
```

13. Create a New Query, and Choose Column Controls in Table

14. Double Click on the table Header then Drag the Content to the field below, then put 92 in the Section ID Criteria

15. Click on Make-table Query and Rename the table as ColumnControlsJea

16. Click Run

17. Rename Column Controls Table into ColumnControls20240916, and then Rename ColumnControlsJea as ColumnControls

18. Right Click on tables then Choose Link Tables

19. Choose ODBC Database in Files of Type, then choose Column Controls

20. Input password: sa

21. Select dbo.T_URBAN_ROOF2, click on checkbox Save Password.

22. Go to tables, and rename dbo.T_URBAN_ROOF2 as T_URBAN_ROOF2.

23. Go to SQLDBX. then give an employee an access to Urban Roof 2

24. Copy the code of Urban Roof and then paste it. Change the section ID from 69 to 92

25. Change the ConstructionMaterial Code to 2 since the Construction Material code of Urban Roof 2 is 2

```
Case 69
```

```
strSQLSpecs = ""
```

```
strSQLSpecs = strSQLSpecs & " SELECT T_Material_Ele.CDNO, M_Category_Master.CAT_NAME, T_ShipmentRequests.ConstructionMaterialCode, M_Material_Master.MAT_NAME, M_REQUEST
```

```
strSQLSpecs = strSQLSpecs & " INTO W_Temp.Specification
```

```
strSQLSpecs = strSQLSpecs & " FROM ImportedShipment INNER JOIN (T_ShipmentRequests INNER JOIN ((T_Material_Ele INNER JOIN M_Category_Master ON T_Material_Ele.CAT_CD =
```

```
strSQLSpecs = strSQLSpecs & " INNER JOIN M_Material_Master ON T_Material_Ele.MAT_CD = M_Material_Master.MAT_CD) INNER JOIN M_REQUEST_MASTER ON M_Category_Master.REQ_CD =
```

```
strSQLSpecs = strSQLSpecs & " ON (T_ShipmentRequests.ConstructionCode = T_Material_Ele.CDNO) AND (T_ShipmentRequests.ConstructionMaterialNameEngTish = M_REQUEST_MASTER.
```

```
strSQLSpecs = strSQLSpecs & " AND (ImportedShipment.RequestWeek = T_ShipmentRequests.RequestWeek) AND (ImportedShipment.RequestYear = T_ShipmentRequests.RequestYear) AN
```

```
strSQLSpecs = strSQLSpecs & " GROUP BY T_Material_Ele.CDNO, M_Category_Master.CAT_NAME, T_ShipmentRequests.ConstructionMaterialCode, M_Material_Master.MAT_NAME, M_REQUE
```

```
strSQLSpecs = strSQLSpecs & " HAVING (((T_ShipmentRequests.ConstructionMaterialCode)='UR') AND ((T_ShipmentRequests.ConstructionMaterialDetailCode)=1));"
```

```
DoCmd.RunSQL strSQLSpecs
```

```
Case 92
```

```
strSQLSpecs = ""
```

```
strSQLSpecs = strSQLSpecs & " SELECT T_Material_Ele.CDNO, M_Category_Master.CAT_NAME, T_ShipmentRequests.ConstructionMaterialCode, M_Material_Master.MAT_NAME, M_REQUEST
```

```
strSQLSpecs = strSQLSpecs & " INTO W_Temp.Specification
```

```
strSQLSpecs = strSQLSpecs & " FROM ImportedShipment INNER JOIN (T_ShipmentRequests INNER JOIN ((T_Material_Ele INNER JOIN M_Category_Master ON T_Material_Ele.CAT_CD =
```

```
strSQLSpecs = strSQLSpecs & " INNER JOIN M_Material_Master ON T_Material_Ele.MAT_CD = M_Material_Master.MAT_CD) INNER JOIN M_REQUEST_MASTER ON M_Category_Master.REQ_CD =
```

```
strSQLSpecs = strSQLSpecs & " ON (T_ShipmentRequests.ConstructionCode = T_Material_Ele.CDNO) AND (T_ShipmentRequests.ConstructionMaterialNameEngTish = M_REQUEST_MASTER.
```

```
strSQLSpecs = strSQLSpecs & " AND (ImportedShipment.RequestWeek = T_ShipmentRequests.RequestWeek) AND (ImportedShipment.RequestYear = T_ShipmentRequests.RequestYear) AN
```

```
strSQLSpecs = strSQLSpecs & " GROUP BY T_Material_Ele.CDNO, M_Category_Master.CAT_NAME, T_ShipmentRequests.ConstructionMaterialCode, M_Material_Master.MAT_NAME, M_REQUE
```

```
strSQLSpecs = strSQLSpecs & " HAVING (((T_ShipmentRequests.ConstructionMaterialCode)='UR') AND ((T_ShipmentRequests.ConstructionMaterialDetailCode)=2));"
```

26. Try to Log in and see if the employee can now access the Urban Roof2

27.

28. Select an Import File.

29. Click Next
